

PRESS RELEASE

PINION AND HEINZMANN PRESENT E-DRIVE SOLUTION FOR HEAVY DUTY E-CARGO VEHICLES

Denkendorf, 11.06.2019: At the Cargo Bike Festival in Groningen, the drive specialists **PINION (central gearboxes)** and **HEINZMANN (electric motors)** present a joint E-Drive solution for ambitious and heavy-duty E-Cargo applications at the HEINZMANN / GreenPack Stand 2.

PINION transmissions are known for their extremely long lifetime and guaranteed functional reliability. Combined with minimum service and running costs PINION is the benchmark in shifting technology. The **HEINZMANN** CargoPower heavy-duty motor is the power pack for professionally used cargo bikes. The motor offers high power density with optimum efficiency.

"In combination, the two systems provide the carefree package for the development of sophisticated and safe E-Cargo vehicles. The drive unit consists of two high-end components that are matched to each other in an optimum sequence. The principle is: "First shift, then reinforce". The combination of rear motor and Pinion gearbox guarantees harmonious riding comfort and significantly less forces and impact to the drivetrain." explains Thomas Raith (Managing Director of Pinion GmbH).

The partners will present their E-Drive solution to the public for the first time at **the International Cargo Bike Festival in Groningen from 14 to 16 June 2019** at the joint HEINZMANN/GreenPack booth. At Stand 2, Tobias Reimann (Technical Account Manager PINION GmbH), Peter MÉRIMÈCHE (Managing Director HEINZMANN) and Stephan Spielmann (Key Account Manager HEINZMANN) will be available as contact persons.
